SPEECH AND LANGUAGE THERAPY

Winter Newsletter

Themes

In the winter, we will be incorporating your child's language goals while we talk about the following themes:

- Winter
- Snow & snowmen
- Winter clothing
- Arctic animals

At Home!

Play in the snow- talk about what your child is doing and what they are feeling

- "it's so cold"
- "you're rolling in the snow"
- "wow, you made a snowball"

It is always a great idea to talk about what your child is doing to continue exposing them to language! You can think of this as being your child's narrator!

AAC Corner

MODEL, MODEL, MODEL!!!

"The average 18-month-old has been exposed to 4,380 hours of oral language at a rate of 8 hours/day from birth. A child who has a communication system (AAC) and receives speech/language therapy 2 times/week for 20-30 minutes will reach the same amount of language exposure (in their AAC language) in 84 years." -Jane Korsten, SLP

This is why it is so important to model on your child's device at home and across all environments! Any modeling is good modeling!

Vocabulary

Here are some of the vocabulary words your child will be exposed to during therapy:

- snow
- penguin
- cold
- gloves
- snowman
- boots
- hot
- coat

Core Vocab

ALL YEAR ROUND

- on/off
- in/out
- stop/go
- up/down
